# YOUR ADA-COMPLIANT SIGNAGE EXPERTS

Where would we be without signs? How would we know which door to use? Which button to push? Your clients' signs are an important part of conducting business.

Let EP-Direct be your experts on the requirements providing signage for the Americans with Disabilities Act. ADA provides those with special needs access to public places, using raised lettering and **braille**. We've studied the state and federal ADA compliance laws, and have determined that, in certain instances, signs alone can bring you closer to compliance.

Our sign department is ready to assist with all your clients' ADA signage needs, including **braille**.
