

## Blades for Roland GCC Cutting Plotter Vinyl Cutter

## Roland

**30°**  
**yellow cap**

**45°**  
**red cap**

**60°**  
**blue cap**

- 30 DEGREE: 30° blades are predominantly used for cutting very thin window tint and mylar materials.
- 45 DEGREE: 45° blades are the standard blade that comes with most vinyl cutters. They are recommended for all standard

cast and calendered vinyls as well as other thin materials such as ThermoFlex Plus.

- 60 DEGREE: 60° [blades](#) are recommended for thicker materials such as reflective films, flock and twill materials and also sand-blast resist.
