

- 
- A schematic diagram of a cable guide assembly. It shows two horizontal black lines representing the main structure. Between these lines, there are two sets of semi-circular indentations. The upper set is labeled "CABLE GUIDE (Upper)" and the lower set is labeled "CABLE GUIDE (Lower)". Each set contains two semi-circular indentations. In the center of each indentation, there is a small circle with a dot in the middle, representing a cable or pin. The entire assembly is enclosed in a red rectangular border.

- 

- If the FLEXIBLE CABLE is not pulled enough or pulled too much, there will be the slack in the CABLE GUIDE.
