

***The Flagship Model of Graphtec Grit-rolling Cutter***

*Advanced Multi-functional Cutting Plotter Technology for Plotting, Cutting and Pouncing Applications.*

# ***Product Introduction***

## ***FC8000 series -60 / -75 / -100 / -130 / -160***

Graphtec America  
August, 2008

# Line-up

- Grit-rolling Cutter FC8000 series -

Featuring the new line of FC 8000 cutters providing the highest performance, functionality, and user-friendly operation.

**FC8000-60**  
24 inch  
\$2995.00

**FC8000-75**  
30 inch  
\$3995.00

**FC8000-100**  
42 inch  
\$4995.00

**FC8000-130**  
54 inch  
\$5995.00

**FC8000-160**  
64inch  
\$6995.00

## Some of the new features include:

**New**

Dual pen holder

**New**

Icon Menu Screen  
**Large 3 " LCD Control Panel**

**New**

**Cutting Plotter Controller software**

**New**

**Center push-rollers 3 pressure settings**

**New**

**Ethernet Interface Option**

# Target market

- Grit-rolling Cutter FC8000 series –

***Expanding into new markets by constantly innovating our products***

# The leading performance in the world

New all-in-one cutter head for supporting additional applications and higher productivity and reliability. The FC8000 series plotters boast the world's highest cutting plotter performance.

## 1. 600gf maximum cutting force

Highest cutting force in its class for cutting a wider variety of materials.

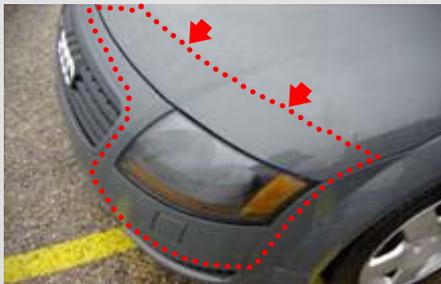

## 2. 58.46 inches/s maximum cutting speed

Fastest cutting speed in its class for the highest productivity.

## 3. Reliable long-length tracking capability

Stronger internal structure for improved media handling. The optional flange set, new designed media basket, and 3 step push roller provides more control on long length cutting for guaranteed 50 feet tracking.

\* When using Graphtec specified conditions

# New Features - Grit-rolling Cutter FC8000 series –

## User-friendly design for simpler operation

- New** Dual Configuration *(2 users settings)*
- Improved** Cut condition setting *(8 conditions each for 2 users)*
- New** 3inches LCD incorporated main unit operation panel
- Improved** Cutting Plotter Controller *(software controls functions for the FC8000)*
- New** GP-GL/HP-GL auto sensing feature *(CM2 version 1.40 or later supports this).*
- New** Step size synchronized feature *(CM2 version 1.40 or later supports this).*

## Features for higher productivity and expanded applications

- New** **Perforation cutting without damaging the blade or cutting strip**
- Improved** 3 pressure settings on the push rollers.
- New** Auto RMS sensitivity control function

## New Features: Cut condition setting

No.	Condition Setting Items	FC7000	FC8000
1	Tool and Offset	Yes	Yes
2	Cutting Force	Yes	Yes
3	Speed	Yes	Yes
4	Acceleration (Quality)	Yes	Yes
5	Tool Up Height	N/A	Yes
6	Cut Line Pattern	N/A	Yes
7	Assign tool	N/A	Yes
8	Tangential Emulation	N/A	Yes
9	Distance Adjust	N/A	Yes

# New Feature: Dual Configuration

Two different users can set and save independent settings for customized jobs on a single FC8000 machine.

## Features of Dual Configuration

- User 1 and 2 selection can be changed in the control panel.
- User name assigned in PC is displayed as the user name.
- USER PRIORITY can be set as the Key or PC.

## See below uses:

### One cutter can be used by 2 users

Each user can choose and edit their individual setting without effecting the other users settings.

### Using multiple types of Media

Quickly change customized settings for each type of media.

### Using two different software packages with different command languages

Instantly change customized settings for different software packages.

# New Feature: 3 inch LCD incorporated

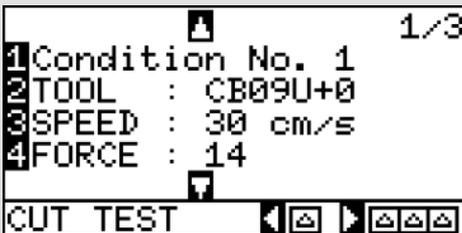

3 inch LCD display with an interactive operation panel.

## New Operation Panel

- ❑ Interactive Menu Screen
- ❑ Icon Menu Screen
- ❑ Direct Cross Cut Key
- ❑ Direct Fast Key for Positioning the head

Icon Menu Screen

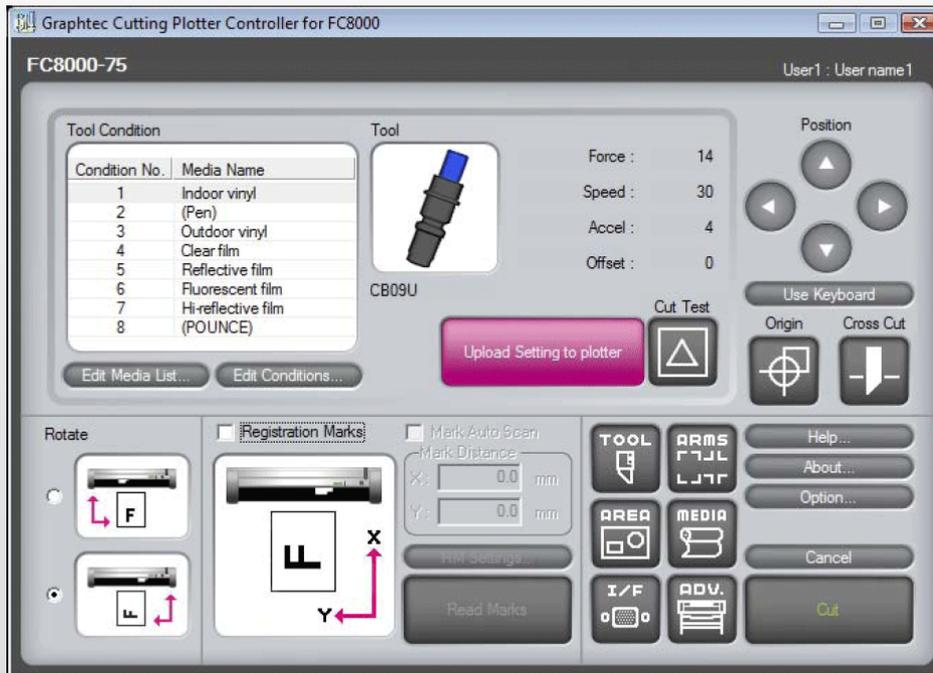

Interactive Menu Screen

3 inches LCD display

# New Feature : Cutting Plotter Controller

Cutting Plotter Controller allows you to control the cutter remotely via PC. The ability to control various plotter settings from a PC dramatically improves work and operating efficiency. New Cutting Plotter Controller Software provides more advanced functions and easy operation.

Cutting Plotter Controller Software Main Menu

## Easy setting from PC

By using the controller software, the plotter settings and operation can be controlled from the PC.

## Saving of tool condition

The tool condition which is set by controller, can have maximum of 100 labels, which can be saved or read as a PC file.

## Reading of plotter settings / transmitting settings to plotter

Tool conditions (condition No.1-8) set by plotter operation panel are readable within the controller. Condition settings are editable and can be reset from the plotter controller software.

## Display plotter settings

Plotter error information and condition information and can be saved for diagnostic purposes.

## Import · export of detailed settings

Settings can be saved in the PC for back up.

## New Feature: GP-GL/HP-GL auto detection

Detects incoming data as GP-GL or HP-GL, and automatically change the command setting.

## New Feature: Step size synchronized function

Data output is automatically adjusted to the appropriate step size.

*\* Cutting Master Software needed to support this function (CM2 version 1.40 or later supports this).*

## New Feature: Now 3 types of interfaces

The FC8000 series has USB2.0, RS-232C and *Ethernet (Option)*, interface.

### ■ USB2.0 :

Standard USB cable for both Mac and PC

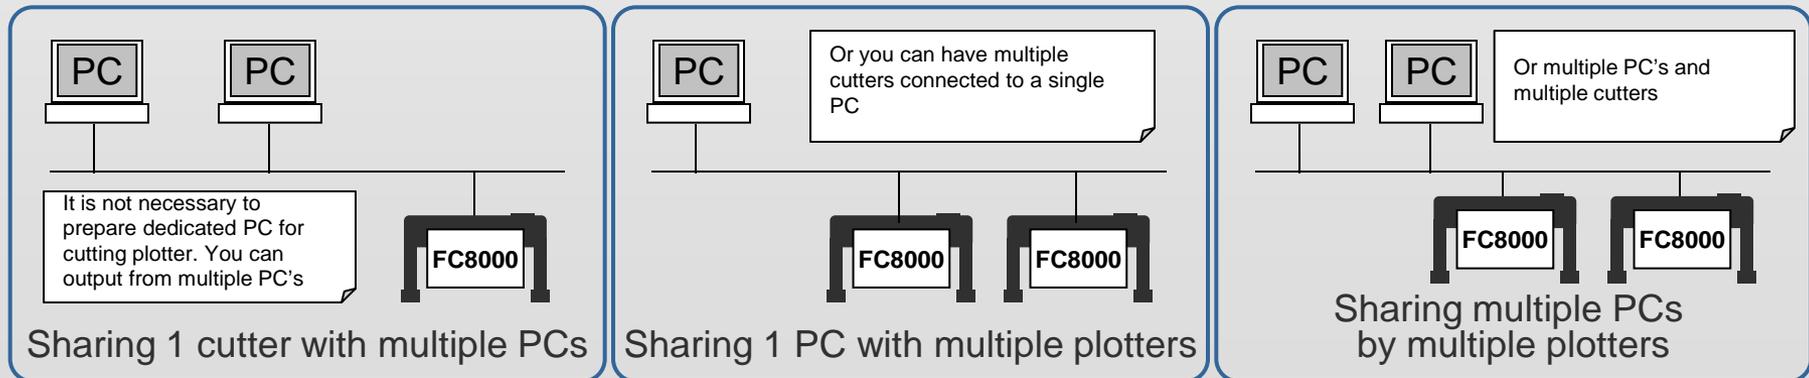

### ■ RS-232C :

Standard RS-232C interface.

### ■ Ethernet (Option) :

**New**

PC standard network interface. Multiple plotters can be used by one PC by network connection. It is possible to use a longer cable (than USB or Serial) with this interface.

# New Feature: Die cutting using perforation

*Decals and patterns can be cut with perforated lines so the cut parts will not fall off.*

Now available the FC8000 has **two pen holder** positions (tool 1 and tool 3). **Tool 1** provides standard vinyl cutting and **Tool 3** provides perforation cutting. By using **Tool Holder 3**, which is positioned over a channel, prevents the blade and cutting strip from being damage when perforation cutting.

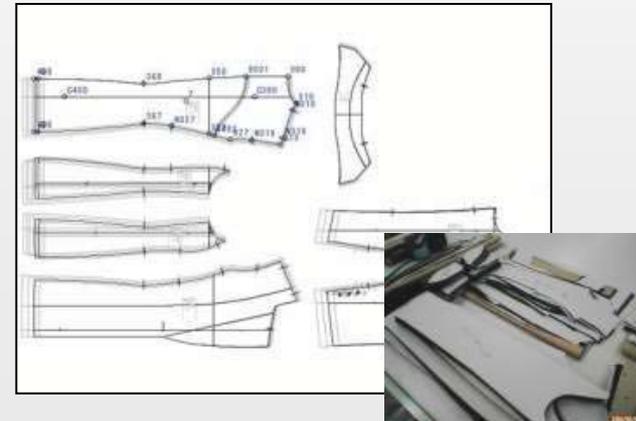

## Print and cut decals

By using the perforation cut feature, time is saved making it easy to separate decals from the vinyl.

## Pattern making for Garment

Perforating cut feature can be used to make paper patterns. The FC8000 enhanced tracking allows for long plots.

\* Please use "tool number setting" as tool 3 in cut condition setting.

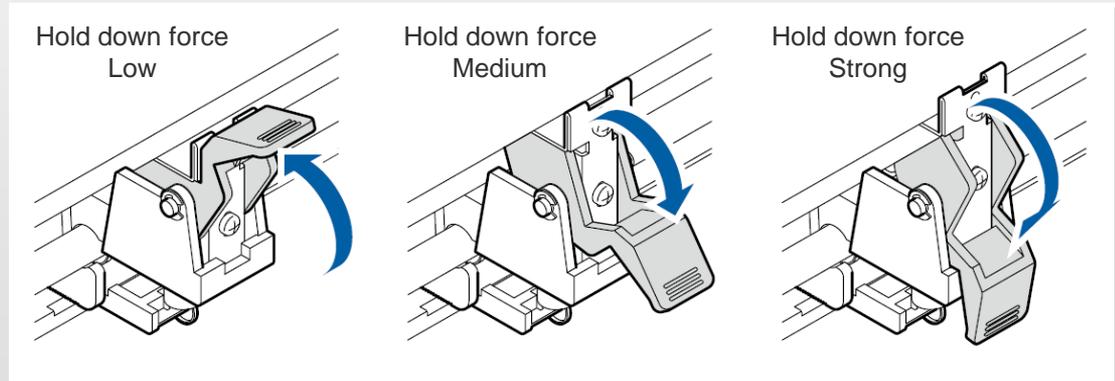

## New Feature: 3 step push roller pressure settings

Push roller pressure is selectable, 3 pressure settings.  
Set the pressure to match the media.

The FC7000Mk2 push roller pressure had 2 settings: “*strong or Low*”.

FC8000 push roller pressure setting has 3 steps: “*strong, middle, and Low*”.

The “*Low*” setting on the FC8000 can help keep media from floating up, it is applicable when cutting media can not be left with a push roller impression (example car window tint film).

Note 1: Both end (outside) push rollers only have strong and medium settings.

Note 2: Outside used push rollers must have the same setting to avoid skewing.

Note 3: We no longer have pinch rollers, we only have Push Rollers.

# New Feature: ARMS sensitivity adjustment

*Advanced Registration Mark Sensing System*

ARMS4.0 is the 4th generation auto registration mark sensing system for improved registration detection.

Productivity of P&C is dramatically improved.

## Auto mark sensor sensitivity adjustment

**New**

Mark sensor sensitivity is automatically adjusted, giving you more varieties of Print and Cut compatible media. *(see more information on the next page)*

## 4 point axis alignment

4 point registration marks for accurate alignment and scaling in both X and Y axis.

## Segment area compensation

Reading the position of the middle registration marks for additional precision in alignment of long – length jobs.

## Multiple mark compensation

Reading marks on multiple designs sequentially for higher productivity

## Auto-detection of mark position

**Patent Pending**

1st mark automatically detected without operator intervention.

## Software control

*Cutting Master2, Cutting Plotter Controller Software*  
Controls the ARMS from the software for easy-to-use operation.

## New Function: ARMS sensitivity adjustment

Auto adjustment of ARMS sensitivity, expands the variety of ARMS readable medias.

*The FC8000 now reads any contrasting color registration marks*

### Advantage

- ▣ Single spot color Blue used on the white paper

It is not necessary to print black registration marks, you can utilize the color of your print. This will be helpful to those contour cutting heat transfer material.

- ▣ Spot White printing on blue media

Outline of patterns which are printed by white ink on blue media can be cut. It is applicable to inkjet printers which are capable of white ink printing on dark material.

# User-friendly design

## Functions for higher cutting quality

- ▣ **Dedicated stand is provided**

A dedicated stand with media stock rollers is provided as a standard accessory. It insures long media runs. In addition, the media basket helps with long length cutting.

- ▣ **Tangential Emulation**

Controls the angle of the blade tip for more accurate thick material cutting.

## Functions for higher productivity

- ▣ **Sorting function**

Internal optimization of vector analysis to minimize media and head movement for faster thru-put time.

# User-friendly design

## User-friendly design for simple operation

### □ Automatic Cross Cutter

Automatic Cross Cutter provides a simple solution for obtaining a straight sheet cut-off of your finished job. Moreover, Direct “CROSS CUT” key provides user friendly operation.

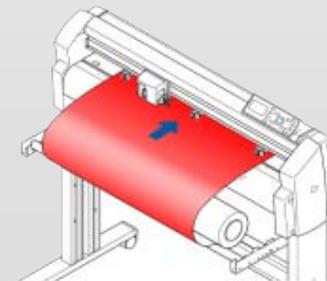

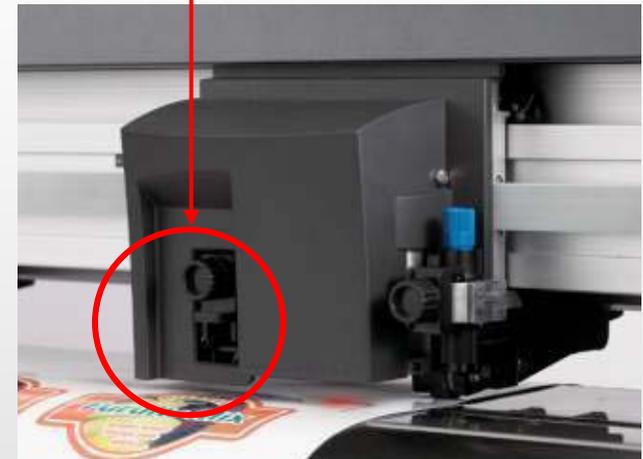

### □ Light Pointer for Manual position adjust

Light pointer is used for manually detecting registration marks. It also works to trace cut images for proofing.

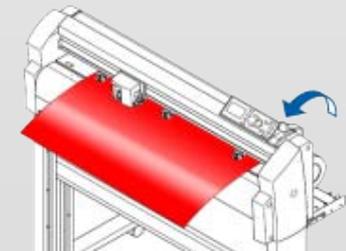

### □ Bi-directional media loading

For convenience and versatility. Users have the capability to load media from either the front or back of the FC8000.

Automatic Cross Cutter

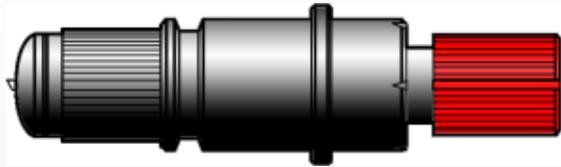

Front loading

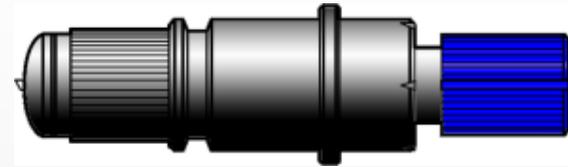

Rear loading

# Variety of Cutter tools

## Cutter Plungers

**PHP32-CB15N-HS**  
For the 1.5mm diameter super steel blade

**PHP32-CB09N-HS**  
For the 0.9mm diameter super steel blade

## Cutter Plungers

Blade model	Diameter	Photo	Spec
CB09UA	0.9mm		Standard blade for cutting vinyl. Suitable for cutting media up to 0.25 mm thick.
CB15U	1.5mm		For cutting thicker media. Suitable for cutting media from 0.25mm to 0.5 mm thick.
CB15UA	1.5mm		For cutting high intensity reflective media.
CB15UB	1.5mm		For cutting small characters on mono vinyl chloride media. Suitable for cutting small size characters that are less than 10 mm.
CB15U-K30	1.5mm		For thick media. The sharply angled point provides a longer cutting edge. Suitable for cutting material from 0.5 mm to 1.5 mm thick.
CB15U-K20-SP	1.5mm		For cutting sandblast rubber. *When using with the plunger PHP32-CB15N-HS, please remove the spring from the blade before insert it to the plunger.

# Cutting Master 2 software

Cutting Master 2, interfaces with Corel Draw and Adobe Illustrator as a plug-in driver.

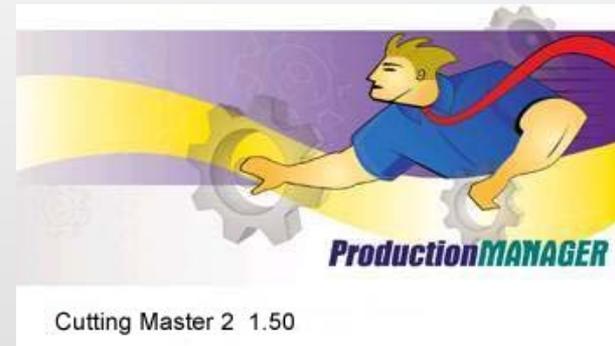

## Compatible software

### Adobe Illustrator

- ▣ for Windows 8, 9, 10, CS, CS2, CS3
- ▣ OS version Windows 98SE, ME, 2000, XP, Vista
- ▣ for Macintosh 10, CS, CS2, CS3
- ▣ OS version OSX 10.2 or later

### Corel Draw

- ▣ for Windows 10, 11, 12, X3, X4
- ▣ OS version Windows 98SE, ME, 2000, XP, Vista

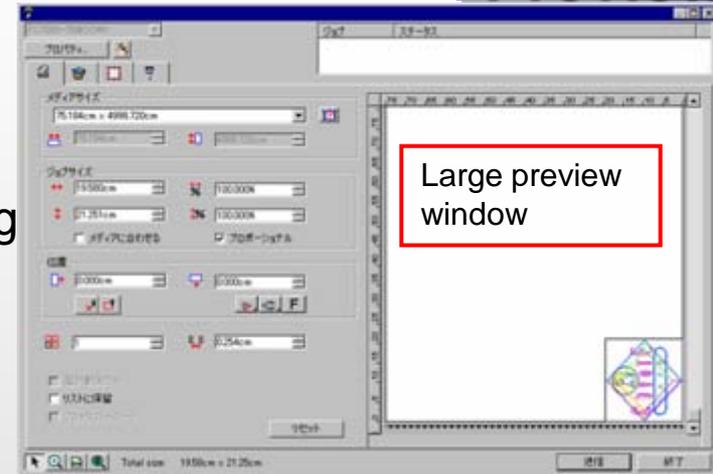

# Cutting Master 2 plotter control

## Plotter control function

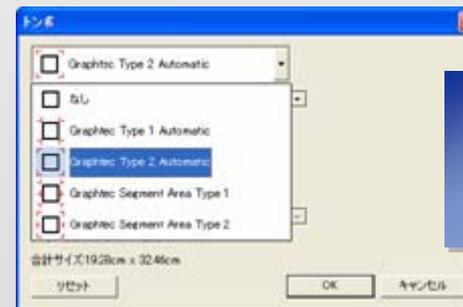

- ❑ Direct output from software
- ❑ Output by color/layer
- ❑ Preview window for check actual cutting
- ❑ Control of cutting condition such as cut and speed
- ❑ 3 types of cut line can be edited
- ❑ Amount of over cut can be specified
- ❑ Weeding line can be added
- ❑ Additional ARMS function
- ❑ Automatic ARMS control by command

## Preview

Large preview window

## Additional ARMS function

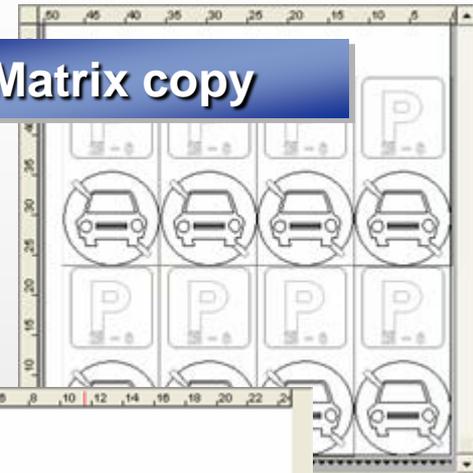

# Cutting Master 2 editing

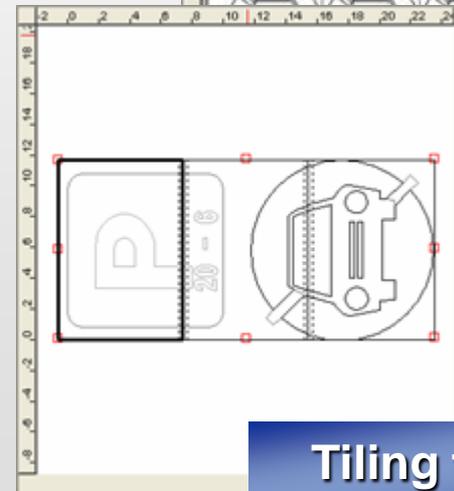

## Edit function

- ❑ Center, Rotate, Mirror for easy layout
- ❑ Matrix copy for higher productivity
- ❑ Calculation formula can be inputted directly
- ❑ Specified width of outline can be detected
- ❑ Auto-welding for binding same color of shapes
- ❑ Tiling / Paneling for segmentation of cutting

### Matrix copy

### Tiling function

# Packaging Specifications

CB0023C-HS	RS-232C cable (IBM compatible model 3m)	4526622042045
ECK0009	2 pen type (dealer option)	4526622323861
OPH-A21	Flange for FC8000	4526622323632
OPH-A22	Push roller assembly for FC8000	4526622323649
OPH-A23	network interface (dealer option)	4526622323847

# Standard accessories

**AC power cord**

1

**USB cable (3-meter length)**

1

**User Guide CD-ROM**

1

- User's Manual (pdf)
- Windows driver/Macintosh plug-in software

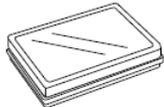

**Cutter holder (PHP32-CB09N)**

1

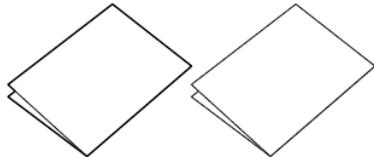

**Cutter blades (CB09UA-1)**

1

**Setup Manual, TO ENSURE SAFE AND CORRECT USE**

1 of each

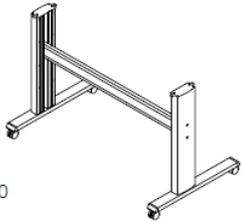

**Water-based fibertip pen**

1

**Stand**

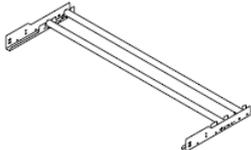

1

- Base assembly x 2
- Stand side bar x 2
- Center bar x 1
- Socket head cap screws (M5) x 20
- Allen wrench (for M5) x 1

**Media bracket**

1

- Media stocker x 2
- Stock roller x 2
- M4 binding head screws x 4

**Cloth basket**

1

- Cloth basket
- Mounts x 2
- Basket tubes (short) x 4
- Basket tubes (long) x 3
- Socket head cap screws (M5) x 4
- Joints x 4

## Description of the CD-ROM

Item	Description	Qty	Remark
Manual (CD-ROM)	FC8000 - CDM01M	1	
Cutting Master 2	For Illustrator / For Corel DROW (for Windows)	1	
Cutting Master 2	For Illustrator (for MAC)	1	
Windows driver	OPS662	1 set	
PC controller	OPS640	1 set
