Modular Display Solutions

IN-STORE • EXHIBITION • PROMOTIONS • EVENTS

CROSSwire represents the latest generation of modular truss systems. Made of a composite material with an aluminum core, it is tough, durable and lightweight - and helps reduce your shipping costs.

The versatility and strength of the CROSSwire system is unique; it offers the ideal platform for an ever-increasing line of accessories: lighting, shelving, literature racks, and even multi-media options - including the capability to easily incorporate large LCD displays.

Unlike many competitor products, CROSSwire can be reconfigured to accommodate changes in floor plans / space restrictions; and our line is constantly being developed and expanded to meet the fast changing demands of today's exhibition and event industry.

CROSSwire®

Never before has a modular display system been so flexible, scalable, versatile, and available at such a low cost.

With CROSSwire the potential is limitless. Point of sale displays in any shape, to small scale trade show booths, all the way to complex multi-aspect rigs for large island exhibits.

The patented CROSSwire system creates a unique frame and background suitable for all types of products and every corporate promotion.

Simple and modular by design, this unique system can be added to or reconfigured as required - all without the need for tools.
