

If RasterLink Tools output causes each line to be cut twice, it may be resolved by changing the following settings:

RasterLink Tools for Adobe Illustrator:

On the EPS output screen, in the **Transparency** area, select the **Custom...** button. On the resulting window, deselect the **Convert All Strokes to Outlines** box.

RasterLink Tools for CorelDRAW:

On the settings window, deselect **Print Special Color Layer** (this is selected by default).
