Tungsten carbide Grade and Applications:

Grade	ISO	Density(g/cm ³)	TRS(N/mm ²)	Hardness(HRA)	Applications
YG8	K20	14.7	1900	89	Suitable for Aluminum alloy, Copper and Acrylic processing. Mainly for the processing of watches and glasses, also for the work pieces' slot processing and parting.
YG8N	K20	14.7	2700	91	Suitable for Stain steel, Cast Iron, Mould steel, Aluminum alloy, Copper and Acrylic processing. Mainly for the processing of watches and glasses, also for the work

					pieces'slot processing and parting.
