# Auto Serialize Feature
Flexi 7 and PhotoPRINT 3
PART I

One of the new features is generating a good deal of interest for it's incredible productivity.
Here are the steps to use the Auto Serialize feature several different ways:

BASIC TEXT REPLACEMENT: **You have nameplates or tags that will all look the same, with small change of information…**

- ☞☞ Create your design and background
- ☞☞ Click on the ARRANGE menu, and roll down to AUTO SERIALIZE
- ☞☞ Set the NUMBER OF COPIES *(ie: 8)*
- ☞☞ Set the number of COPIES IN A ROW: *(ie:2)*
- ☞☞ Set the SPACING between the copies Horizontally and Vertically
- ☞☞ Click to SELECT THE TEXT TO BE REPLACED *(ie: NAME)*
- ☞☞ Click NEXT
- ☞☞ Type in each of text lines you wish to replace with
- ☞☞ Click FINISH to have the nameplates generated as you've outlined

AUTOMATIC TEXT REPLACEMENT: **You have the text already set in a spreadsheet to save you time of inputting data…**

- ☞☞ Create your design and background
- ☞☞ Click on the ARRANGE menu, and roll to AUTO SERIALIZE
- ☞☞ Set the NUMBER OF COPIES *(ie: 10)*
- ☞☞ Set the number of COPIES IN A ROW: *(ie:3)*
- ☞☞ Set the SPACING between the copies Horizontally and Vertically
- ☞☞ Click to SELECT THE TEXT TO BE REPLACED *(ie: NAME)*
- ☞☞ Click BROWSE to find the TEXT file you have
- ☞☞ Click to highlight the desired TAB DELINATED .TXT file
- ☞☞ Click OPEN to select the data file to use
- ☞☞ Click NEXT to automatically fill in the text to replace
- ☞☞ If desired, the text in the list can be edited at this point
- ☞☞ Click FINISH to have the nameplates generated as you've outlined
