

## Auto Serialize Feature Flexi 7 and PhotoPRINT 3 PART II

*One of the new features is generating a good deal of interest for it's incredible productivity.*

**Here are the steps to use the Auto Serialize feature several different ways:**

**NUMERIC REPLACEMENT:** You have plates or tags that will all look the same, with a number change on each one...

- ✂ Create your design (ie: Parking Tag)
- ✂ Click on the ARRANGE menu, and roll down to AUTO SERIALIZE
- ✂ Set the NUMBER OF COPIES (ie: 8)
- ✂ Set the number of COPIES IN A ROW: (ie:2)
- ✂ Set the SPACING between the copies Horizontally and Vertically
- ✂ Click to SELECT TEXT TO BE REPLACED (ie: 100)
- ✂ Click NEXT
- ✂ Click SERIALIZATION button
- ✂ Select NUMERIC as the type of serialization you would like to do
- ✂ Enter the START number you would like (ie: 100)
- ✂ Enter the INCREMENT you want to jump numbers (ie: 25)
- ✂ Click OK to automatically fill in the numbers to replace
- ✂ If desired, the numbers in the list can be edited at this point
- ✂ Click FINISH to have the tags generated as you've outlined

**TEXT & NUMBER REPLACEMENT:** You can combine text replacement with numeric replacement...
