### Windows 7 Support Information

#### Color Software

Please refer to the chart below for Windows 7 compatibility and support information for color printing software. Software that is not listed in this document has not been tested and will not be supported on this new operating system.

	Microsoft Windows 7 Editions						Full Windows 7 support planned?
	Home Premium		Professional		Ultimate		
	32-bit (x86)	64-bit (x64)	32-bit (x86)	64-bit (x64)	32-bit (x86)	64-bit (x64)	
Roland VersaWorks	Not Supported		Supported. Works with some limitations (*1)				Yes
Roland COLORIP	Not Supported		Not Supported. Works with some limitations (*2)				No

(\*1) The version 3.30 has been tested on Windows 7 Professional and Ultimate and found to have the following limitations:

- The PostScript printer driver (RolandVW) will not install automatically when the printer is added in the Printer Setup. Please refer to the manual installation procedure.
- GX cutters are not recognized by VersaWorks.

(\*2) The development for Roland COLORIP has been discontinued and there is no plan to update this software. The software has been tested on Windows 7 Professional and Ultimate editions and found to have the following limitations:

- Will not connect with measurement instrument such as i1 (EyeOne).
- Will not connect with SP-300

Note that you may experience issues other than the ones listed in this document on this new operating system. Future versions of VersaWorks will address currently known compatibility issues.

#### Printer Drivers

	Microsoft Windows 7 Editions						Full Windows 7 support planned?
	Home Premium		Professional		Ultimate		
	32-bit (x86)	64-bit (x64)	32-bit (x86)	64-bit (x64)	32-bit (x86)	64-bit (x64)	
VersaCAMM Driver (SP-300, SP-300V)	Not Supported						No
Cutting Driver (SP-540V)	Not Supported						No

Note that VersaCAMM driver is not required if you are using Roland VersaWorks.
