

ZUND Blades Types(drag blades, oscillating blades, rotary blades)

ZUND Blades Types

In general, there are the following types of blades for Zund Cutters: drag blades, oscillating blades, rotary blades.

Drag blades

Drag knives are used in non-powered tools such as UCT, KCT, VCT, SCT, C2, insertion sleeve 40. Suitable for cutting foil, paper, thin folding cartons, banners, etc.

Round-stock blades (C2, C2P, KCT, KCM-S): Z1, Z2, Z3, Z4, Z5, Z7

Flat-stock blades (UCT, SCT, insert sleeve 40): Z6, [Z10](#), Z11, Z44, Z46, Z101, Z102, Z103, Z83

V-cut blades: Z70, Z71, Z701, Z73

Mat-cutting blades (PPT): Z30, Z33, Z34, Z35

刃口锋利 · 切削流畅

Oscillating blades

Oscillating blades used in EOT/POT oscillating tools for cutting thick and tough materials.

Oscillating blade — pointed: Z16, Z17, Z20, [Z21](#), Z22, Z60, Z66,

Z601, Z606, Z608

Oscillating blade — flat: Z26, Z41, Z42, Z61, Z62, Z63, Z64, Z68, Z69, Z82, Z201, Z202, Z203, Z204, Z603, Z605, Z607

Rotary blade

Rotary blades — decagonal blades — are used in DRT/PRT tools for cutting breathable materials such as textile, carbon fiber, glass fiber, etc.

Rotary blades: Z50, Z51, Z52, Z53
